Helping My Community As a Student

I want to be a better student this semester and help my community to be better. If you are a good student, you can be more useful to your community. Ecology is a very important subject because if I understand ecological problems, I can make my community cleaner and healthier. With little changes, life in a small community can improve. If life in a small community improves, it impacts people's lives. If people's live are impacted in a positive way, the world is better. And if the world is better, people are happier.
